

Polaroid Digital Miniportrait Camera System

Introducing the

# Digital Miniportrait Camera System

Available May 31, 2003

new!

Apparently, "instant" images just weren't fast enough.

Announcing the **new** Polaroid Digital Miniportrait Camera System. All-in-One, Plug & Play digital camera and printer.

Image enhancement  
and printing controls

**one** touch button to  
capture and print

Fast USB connection

Large tilting preview LCD screen  
*(largest available on the market)*

Zooming control  
*(widest available on  
the market)*

Autofocus lens  
Fast print time  
(about 1min. 20sec.)

The Digital Miniportrait Camera System is versatile in every aspect:

- Installation as easy as plugging in the power cord
- Compact design — small enough to fit under a counter
- Portable system can easily be moved

#### Even More Distinctive Features

- Various output possibilities including 1 up, 2 up, 4 up, and 6 up
- Zoom range of 6.2 - 18.6 mm (A "must have" for proper child photography)
- Image enhancement including color, sharpness, brightness, and contrast adjustments can be done without having to re-take the image

- Perfect lighting management makes the system suitable for any location
  - compatible with pro studio lighting equipment (x-sync or slave lights)
  - powerful built-in strobe eliminates all external fluorescent or tungsten light
- Additional software available for extra business image storage and badge-making opportunities

#### Service Matters

##### No Installation Service Required

Thanks to the unique "Plug & Play" design, no service effort is necessary to get started

##### Repair Service

- Full Polaroid warranty and support
- Full sales support
- Extended warranty available
